GitHub: github.com/Omhari66
Portfolio: om-hari.vercel.app

Email: omharishukla66@gmail.com
Mobile: +91 9005923222

SKILLS

Languages:	C++, Python, C, Java, SQL
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend:	FastAPI, Node.js, Express.js, REST APIs,
AI / ML:	PyTorch, YOLOv8, NLP, RAG Pipelines, Sentence-Transformers, Vector Search, Embeddings
Tools & Platforms:	MongoDB, PostgreSQL, Qdrant, Redis, Git, Claude Code
Soft Skills:	Problem-Solving, Leadership, Communication, Adaptability, Creativity

EXPERIENCE

Freelance Full-Stack Developer khabar24times (Independent Client Project) Live	Jun' 26 – Jul' 26
- Designed and independently developed a production news platform for an external client using Next.js 14, TypeScript, and PostgreSQL, implementing a 3-tier Service-Repository architecture and deploying on Vercel to serve 70+ articles across 18 categories. - Engineered a 4-tier RBAC system (Admin/Editor/Reporter/User) and editorial state machine (Draft/Review/Legal Check/Publish) with versioning, one-click rollback, and soft-delete recovery for 5 reporters and 14 production users; optimized delivery using Next.js ISR, Prisma query monitoring, Cloudinary transforms, and automated JSON-LD, RSS, and sitemap pipelines. - Resolved 7+ production incidents involving geolocation bugs, WhatsApp thumbnail failures, PDF encoding crashes, and mobile CORS errors while providing post-launch client support and shipping hotfixes within hours.	

PROJECTS

SmartOmniSentinel GitHub	Aug' 26
- Built a 7-stage real-time violence detection pipeline using YOLOv8 pose estimation, 34-dimensional keypoint features, centroid tracking, a 16-frame GRU sliding window, 5/8-vote temporal smoothing, and multi-signal risk scoring, running at 4 FPS with a 30-second per-track alert cooldown. - Trained a GRU temporal classifier using horizontal-flip augmentation and weighted cross-entropy for class imbalance, achieving 0.806 F1, 0.75 precision, and 0.87 recall on binary violence detection. - Integrated an asynchronous FastAPI backend with WebSocket event streaming, JWT access/refresh authentication, SHA-256-hashed incident evidence storage, and Gemini Vision API scene descriptions, delivering dashboard updates at ~150 ms refresh intervals. Tech Stack: Python, PyTorch, YOLOv8, OpenCV, FastAPI, SQLAlchemy	
AdaptIQ GitHub	Apr' 26
- Architected a full-stack RAG pipeline for PDF/DOCX documents with semantic chunking, embeddings, Qdrant vector retrieval, cross-encoder reranking, and citation-backed streamed LLM responses. - Created four adaptive tutoring modes (Teacher, Revision, Exam, Normal) with prompt-engineered response control, automatic difficulty scaling, and per-topic confidence-based weak-topic detection. - Implemented real-time SSE streaming, asynchronous document processing via Celery, JWT authentication, a quiz generation engine, and an analytics dashboard for progress tracking. Tech Stack: Python, Next.js, FastAPI, PostgreSQL, Qdrant, Redis, Groq API	

CERTIFICATES

Intermediate Machine Learning kaggle	Sep' 26
Microsoft Applied Skills: Get Started Developing Agents in Microsoft Foundry Microsoft	Aug' 26
Oracle Data Platform 2025 Certified Foundations Associate Oracle	Nov' 25

EXTRACURRICULAR ACTIVITIES

Video Editor Banaras Anime Club — Edited promotional and event videos for club activities and social media content.	Nov' 24 – Jan' 25
Cybersecurity Awareness Volunteer WNS Cares Foundation WCF	Jun' 25 – Jul' 25

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology	Aug' 24 – Present
Computer Science and Engineering; CGPA: 8.54	
BBS Smriti Vidyapeeth	Auraiya, Uttar Pradesh
Intermediate	Mar' 22 – May' 23
PCM; Percentage: 79%	
Matriculation	Mar' 20 – May' 21
Percentage: 81%
